PROJECTS

Personal Portfolio and Blog, tylerjones.info

Sept 2020

- tylerjones.info was built using Node.js, Express, MongoDB, and Mongoose. It features a password-protected dashboard where projects and blog posts are created and then saved in a MongoDB database. The front-end homepage displays the projects and posts as dynamically generated content from the database. The website is self-hosted on a virtual private Ubuntu server through Digital Ocean.

retroTECH Twitter Bot, *Georgia Tech Library*

Sept 2020

- The [Georgia Tech Library's retroTECH lab](#) specializes in collecting vintage technologies, which includes early video game consoles. This Twitter bot tweets weekly an image of an item from this collection with a link to a playable emulated version from the Internet Archive's Console Living Room. The bot was built using Node.js and leverages Twitter's API.

Kurt Vonnegut API, kurtvonnegutapi.com

Aug 2020

- The [Kurt Vonnegut API](#) is a RESTful API built using Node.js, Express, MongoDB, and EJS. It was designed to serve metadata on Kurt Vonnegut's bibliography, currently returning information on his novels, collected works, and plays as JSON. The API is self-hosted on a virtual private Ubuntu server through Digital Ocean.
